QUESTION NO.	QUESTIONS
1	Choose dataset that suits your interest from Kaggle that can be easily cleaned. Dataset must be 500 rows and above.
2	Formulate at least 3 questions/hypotheses before processing the dataset.
3	Clean the dataset accordingly. Narrate the steps you did in cleaning.
4	Generate at least 3 data visualization tools (bar charts only count as one).
5	From the processed data and obtained visualizations, generate at least 3 insights that lead to decision points/recommended actions
6	Reflect on the importance of the concepts that you have learned and applied in the project.
7	Cite all sources used, including the dataset link.

3 HYPOTHESIS BASED ON KAGGLE DATASET

Hypothesis Number	Statement
1	Is there a significant relationship between years of experience and salary among the data science job positions?
2	Data science job salaries vary based on the employment type, with full-time employees receiving higher salaries compared to contract or part-time workers.
3	Data science job salaries vary based on the size of the employing company, with larger companies offering higher salaries compared to smaller ones.

NARRATE THE STEPS YOU DID IN CLEANING

Steps	Process
1	I removed the columns 'Salary' and 'Salary Currency' because they were redundant. I kept 'Salary in USD' to make comparisons easier.
2	I fixed the row numbers on the side, ensuring that if a row contains a value, it is not marked as 0.
3	I removed the abbreviated versions of 'Experience Level', 'Employment Type', and 'Company Size' to avoid confusion.
4	I added a border to clearly separate the modified sections.
5	I standardized all column names to follow a consistent format.

DATA VISUALIZATION / CHARTS

Count of Company Size

Count of Employment Type

Count of Experience Level

INSIGHTS AND ACTIONS

Number	Topic	INSIGHTS	ACTIONS
1	Years of Experience and Salary	More experienced data scientists earn higher salaries, showing a positive relationship between experience and pay.	Implement career progression plans recognizing employees' expertise. Regularly review salaries to reflect experience and contributions.
2	Employment Type and Salary:	Full-time data scientists earn more than contract or part-time workers, indicating salary differences based on employment type.	Adjust compensation for contract and part-time workers. Consider additional benefits to make alternative arrangements more appealing.
3	Company Size and Salary:	Larger companies pay higher salaries compared to smaller ones, highlighting differences based on company size.	Evaluate salary competitiveness relative to company size. Consider performance-based incentives to attract talent, especially in smaller companies.
4	Experience-Based Salary Growth:	Salaries increase with experience, suggesting progressive salary growth.	Develop career plans for skill enhancement and leadership opportunities. Regularly adjust salaries to reflect individual contributions.
5	Employment Type and Preferences:	Salary disparities show preferences for employment types, indicating different priorities among data scientists.	Understand employee preferences through surveys. Tailor recruitment and benefits to attract talent based on preferred work setups.
6	Company Size and Culture Impact:	Salary variations reflect company culture and resources, emphasizing their influence on compensation practices.	Foster an inclusive culture valuing employee contributions. Regularly review salaries to align with company values and market standards.
7	Salaries change based on Company's Location	Salaries vary significantly based on company location and employee residence.	Invest in employee training tailored to industry trends. Provide opportunities for certifications and workshops to enhance skills and marketability.

REFLECTION

Reflecting on this dataset has taught me a lot about the data science job market and what it takes to succeed in the future. I've learned that gaining experience and improving skills are key factors in getting better job opportunities and higher salaries. This shows how important it is to focus on learning and growing now, so that I can have a successful career later on.

As a college student at Cavite State University - Imus Campus, I see the importance of continuous learning and improvement. The dataset clearly shows that people with more experience tend to earn more, which motivates me to work hard and gain as much knowledge and skills as I can while I'm still in school. This experience has inspired me to set clear goals for my future career. I understand the importance of finding what interests me in the field of data science and working towards becoming an expert in those areas. Whether it's learning programming languages or exploring different aspects of data analysis, I'm committed to growing and becoming the best I can be.

Overall, this project has given me a sense of excitement and determination about my future. I'm eager to keep learning and growing, knowing that it will help me succeed in the field of data science and beyond.
